

COMPLIMENTARY GUEST INVITATION
BENCHMARK AND NETWORK WITH PEERS

Transitioning to a Positive Security Model with Zero Trust and Micro-Segmentation

Peer to peer sharing on trends, strategies
and tactics for 2023

Wednesday 1 March 2023
17:30-21:30

Aquavit | Stockholm Room | London

Kindly Sponsored by

 **COLORTOKENS**

About the venue...

Aquavit London | Stockholm Room | Mayfair | London

The CISO-Zero Trust 360 Dinner Roundtable will be hosted in the private dining room, Stockholm, at Aquavit London. A fresh, new concept that combines inspired signature dishes with sophisticated design, all in a uniquely Nordic style. Situated in the recently re-developed St James's Market in central London. Well established in New York (two Michelin stars) and Tokyo – where the experience modernises traditional Nordic ingredients and cooking processes served as a fine dining experience – the recently opened central London branch, in St James's Market, has taken a more contemporary approach that focuses on serving a mix of dishes to celebrate the region's diverse fare.

Transitioning to a Positive Security Model with Zero Trust and Micro-Segmentation

Peer to peer sharing on trends, strategies and tactics for 2023

You are invited to participate in this unique dinner roundtable discussion hosted at Aquavit, the restaurant for Scandinavian fine-dining near Piccadilly in central London.

Hosted by Pulse Conferences and kindly sponsored by ColorTokens, this group discussion will connect peers to discuss and compare approaches to Zero Trust and micro-segmentation.

Zero Trust has progressed beyond hype to become the go to cybersecurity strategy for most organisations. Micro-segmentation is a great first step to robust security, but only if you get it right. Micro-segmentation evolved from a need to secure data centres, applications, and workloads from advanced threats that would breach the perimeter and move laterally without detection.

Join CISO peers and a senior strategist from ColorTokens to discuss lessons learned and the way forward in 2023!

Key discussion points:

- Current threat landscape and trends. What have I learned to take forward from 2022?
- Zero Trust strategies that would be critical for 2023
- What do we mean by Zero Trust and Micro-segmentation? What do these approaches involve? What are the pros and cons?
- How can we plan and build resilience?
- Micro-segmentation strategy – what are the benefits and challenges? How would you introduce Micro-segmentation as part of your Zero Trust journey?

The group discussion will be conducted under The Chatham House Rule of non-attribution. Pulse Conferences is your host for the evening.

We look forward to meeting you for what promises to be a dynamic discussion with peers and a memorable, refreshing and Nordic-inspired culinary experience.

Yours sincerely,
Team Pulse
Pulse Conferences

**Please note that the Roundtable is only open to CISOs and senior cybersecurity practitioners who are currently doing the job of securing the mid to large size organisation where they currently work.*

Approximate timings

17:30-18:30 Guests arrive and welcome drinks

18:30-21:00 Discussion while dinner is served.

21:00-21:30 Conclusions, goodbyes and guests depart

About ColorTokens

ColorTokens Inc., a leader in proactive cybersecurity solutions that enable organizations to become cyber resilient. Through our cloud-delivered, frictionless ColorTokens Xtended ZeroTrust Platform™, ColorTokens enables businesses to leverage real-time visibility, workload protection, endpoint protection, application security, and zero-trust network access—all while seamlessly integrating with existing security tools. Our solutions are designed for modern distributed environments, and drastically reduce operational complexity and cost of ownership.
