LEADING CYBERSECURITY INNOVATION: NAVIGATING EMERGING TECHNOLOGY, TESTING AND VULNERABILITY MANAGEMENT IN 2025

Join us for an intimate gathering where you can connect with CISO peers, diving deep into cybersecurity innovation.

It is said that 60% of breaches are linked to poor patch management and that 80% of breaches are caused by hackers finding and exploiting known vulnerabilities. How are we finding and fixing vulnerabilities? As CISOs, what are our collective predictions about the future of testing and vulnerability management?

Key talking points:

- How are we identifying and addressing vulnerabilities in our digital infrastructure?
- Emerging technology and systems: How are our teams adopting technology to help identify and address vulnerabilities?
- What common challenges do we/our teams face when remediating new vulnerabilities?
- Budget vs efficiency – How do we maximise efficiency when identifying vulnerabilities with a budget?
- Future predictions: Testing and Vulnerability Management in 2025

Brought to you by Pulse Conferences and sponsored by **OnSecurity**, this exclusive dinner discussion will be hosted under the Chatham House Rule, ensuring candid and insightful exchanges.

GUESTS ARE ENCOURAGED TO ACTIVELY CONTRIBUTE TO THE DISCUSSION.

Gain fresh perspectives and draw from the experiences of your peer group, leading to valuable and actionable takeaways. Pulse Conferences will be your host for the evening while you enjoy a top culinary experience! .

ABOUT ONSECURITY

OnSecurity is leading the way in pentesting, offering advanced cybersecurity solutions with effective and insightful testing. We make managing and delivering pentests easier with innovative technology, helping businesses of all sizes strengthen their security.

AS A CISO, WHY ATTEND?

- Led by with and for CISOs – hear real-world journeys and experience shared, what works, what doesn't.
- Engage in an intimate and open setting – hosted under The Chatham House Rule of non-attribution
- Gain valuable takeaways and highlight best practices for integrating testing into your cybersecurity strategy while you enjoy private dining at Six Park Space London.
- Forge connections to expand your professional network with CISO peers
- Hosted in a memorable private fine-dining setting in a prestigious, convenient and central venue

Seats are limited, we encourage you to secure your place around the table today.

Join today to be part of the **CISO 360 Dinner Roundtable: Leading cybersecurity innovation!**

ABOUT SIX PARK SPACE

Reception 17:30–18:30 – Six Park Space – Brabourne Room
Dinner 18:30–21:30 – Six Park Space – Brabourne Room

Elegant Edwardian meets Garden chic.

Restored in 2023 to its former glory, lavish design detail, we are delighted to introduce guests of the CISO 360 Roundtable to the stunning Six Park Space! A vast ornate fireplace and an exquisite ceiling dressed with a timeless chandelier establishes a notable welcome. A patterned tiled entrance leads onto a light wooden floor, dressed with a stunning feathered carpet piece, that transports guests through picture perfect, glass framed double doors, into our serene garden oasis. The Brabourne Rooms natural colour palette highlights the evergreen flora which invites the outside in.

**Co-Steered by an OnSecurity Strategist and:
Martyn Booth, CISO, dunnhumby**

Martyn is Chief information security officer at dunnhumby, the world's largest consumer data analytics organisation. He runs a large team and is an experienced cyber security practitioner, with over 20 years experience in the field, spanning big-4 consulting and running large teams. He advises multiple VCs and start ups, operates at board level and is seen as a strategic partner to the businesses that he advises. His technical background, coupled with his MBA for Durham, enables him to operate at the highest levels of business with a deep technical understanding of the security domain.
